

Residential Elevator

Taking your home to the next level

10APR25 | MK-000217-B

Add a touch of luxury to suit your lifestyle

with the latest in premium home access: a Pollock Residential Elevator

Images for guidance only

Travel in style and with ease in your home with our elegant Residential Elevator, and enjoy your home well into the future.

Providing smooth and quiet through-floor travel, the elevator includes external controls on both floors, and is equipped with our **Intelligent Logic Diagnostic Display**, offering a wealth of benefits to the user.

Quick and easy to install, the lift is located close to, but not attached to the wall. When the lift is not in the room, enjoy all of your living space.

UNIQUE TO
POLLOCK HOMELIFTS

Intelligent Logic Diagnostic Interface

In car diagnostic display screen (4 line) as standard or upgrade to 7" LCD screen

Since 1983, Pollock Lifts have been Ireland's only Residential Elevator manufacturer and the ultimate choice for adding value to home access using the latest technology.

Our innovative digital control system brings a wealth of benefits not only for end users but also for installers and service technicians with easier installation process, simplified servicing, and reduced fault finding.

From installation to operation, every detail has been designed with you in mind.

Trip Counter

tracks number of travel cycles throughout lift lifespan

Service Due Indicator

with overdue notification ensuring regular maintenance

Lift Fault Memory Log

on board system for service engineers

Fault Source Identified

enabling simple issues to be fixed over the phone

Self-check Safety

prior to commissioning for extra safety assurance

Lift Deactivation System

Features and options to make it your own

Control the lighting to suit your mood

Why only have white LED lighting when you can enjoy a full spectrum of lighting colors?

Select the optional color-changing LED lighting with remote control.

7" Color LCD Display

Cabin handrail with controls

In-car emergency telephone

Tip-up seat

Oak effect vinyl flooring

Shallow ramp – less than 1"

Enjoy the benefits of a Electric Drive System

Our Residential Elevator uses Electric Drive as standard to provide the most comfortable travel experience and installation and operational benefits.

- Soft start/stop
- Quieter travel
- Self-contained unit
- Smaller footprint
- Higher travel distance
- Less expensive to run
- Environmentally friendly

We love our Residential Elevator. Quiet and stylish - we were able to choose colors that perfectly matched our decor and the service from Pollock Homelifts was outstanding.

Footprint Options

Electric Drive System
