

THE "POWER" OF THREE

PINNACLE STAIRLIFT OPTIONS

Fully powered, fully prepared to give you the lift you need, Harmar's Power Swivel and Power Footrest options are the perfect features to add to your Pinnacle Straight Stairlift. Paired with our automatic folding rail, the power of three is now available in one stairlift, creating the ultimate accessibility tool.

FOLDING RAIL

WORRY FREE

Harmar's patented folding rail is an innovative option that was designed to eliminate obstructions at the bottom of the stairs. Folds upright when the stairlift moves towards the top of the staircase.

The automatic, mechanical design helps ensure dependable, trouble-free operation.

- The rail and seat move in tandem via the armrest toggle.
- Charging strips above and below the folding section of the rail ensures that your Pinnacle is always on charge no matter where you park your lift at the bottom of the staircase.
- The stairlift continues moving as the rail deploys or folds, saving 10 - 15 seconds per trip.

I really like this Pinnacle Folding Rail design. It's so simple as it deploys and retracts automatically when I ride my lift. I don't have to worry about blocking the walkway or door at the bottom of my stairs.

SSL-SL300FR PRODUCT SPECIFICATIONS

WEIGHT CAPACITY	300 lb
TRACK LENGTH	15' 6"
FOLDED WIDTH	13 ½"
FEATURES	<ul style="list-style-type: none"> - Automatic deployment - Continuous motion - Charging strips above and below the hinged section of rail for flexibility

THE "POWER" OF THREE

PINNACLE STAIRLIFT OPTIONS

POWER SWIVEL

- Continued travel up the rail and swivel at the top landing.
- Five seconds to swivel – faster and quieter than others on the market.
- Addition of power swivel does not change seat height more than ½".

POWER FOOTREST

- Control on underside of armrest.
- Two seconds to raise up or lower down.
- Can be activated while seated for easier dismount.
- Adjustable footrest height benefit added to the SL300 model

A unit must have an "Options Chassis" in order to be compatible with power options.

- SL300 PS and/or PF – 2-year warranty
- SL600 PS and/or PF – 3-year warranty

Manual footrests meant I had to keep bending down to fold and unfold it. And manual swivels called for extra strength I just don't have. These powered functions made my Pinnacle that much easier to use and I love it!
